Somatic psychology is a form of Psychotherapy that focuses on somatic experience, and the embodied self, including therapeutic and holistic approaches to body. Body psychotherapy is a general branch of this subject, while somatherapy, eco-somatics and dance therapy, for example, are specific branches of the subject. Somatic psychology is a framework that seeks to bridge the mind-body dichotomy.

Somatic psychology - Wikipedia

Psychological testing is the administration of psychological tests, which are designed to be "an objective and standardized measure of a sample of behavior". The term sample of behavior refers to an individual's performance on tasks that have usually been prescribed beforehand. The samples of behavior that make up a paper-and-pencil test, the most common type of test, are a series of items.

Psychological testing - Wikipedia

Taking into account the number of publications/studies, academic programs, and/or practicing professionals, cognitive behavioral therapy (CBT) is arguably the gold standard of the psychotherapy field. However, recently, some colleagues have argued for plurality in psychotherapy, questioning the status of CBT as the gold standard in psychotherapy (), because many studies are of low quality and ...
