A biome / ˈbiːoʊm / is a community of plants and animals that have common characteristics for the environment they exist in. They can be found over a range of continents. Biomes are distinct biological communities that have formed in response to a shared physical climate.

Biome - Wikipedia

Polymorphism in biology and zoology is the occurrence of two or more clearly different morphs or forms, also referred to as alternative phenotypes, in the population of a species. To be classified as such, morphs must occupy the same habitat at the same time and belong to a panmictic population (one with random mating).. The term polyphenism can be used to clarify that the different forms ...

Heroic men, heroic women, and animals . See also the section The courage of the bullfighters, which includes material on the courage of the rock climbers and mountaineers, including the remarkable achievements of the free climber Alex Honnold.. This is a very varied section, like some other sections of the page. So much writing in support of bullfighting is suffocating in its exclusion of the ...
